

How to share this free, multi-cultural arts education assembly with your students:

We suggest several ways for teachers to incorporate the Virtual PAL program in their class curriculum:

1. **Review the Study Guide with your class** and have a discussion about your students' expectations and prior knowledge before watching the performance video.
2. **Watch the PAL video with your class.** Control play/stop options for your entire class to engage students during the performance with questions and discussions.
3. **Share the PAL video with students to watch on their own or with a parent at home.** Have a follow up Zoom discussion with your students. Use the study guide for more ideas and suggestions for supplemental activities.
4. **Recruit a parent volunteer to host a Zoom watch party.** Have a follow up Zoom discussion using the study guide and/or activities.
5. **View the AEF visual arts resource videos together in class and assign the art projects as independent work.** Have students upload their final projects to Flipgrid or directly to Rhythmix.
6. **Send any PAL related art/writing projects or thank you letters to pal@rhythmix.org.** RCW shares select student work with our funders to help secure future grants for PAL.

If you need assistance integrating these assemblies into your curriculum and learning objectives, please let us know!
